Optimize Your Investment

PRO-LITE™ Sterilization Trays

What if trays for your V-PRO Sterilizer could unlock new efficiencies in your sterilization process?

With the new PRO-LITE Sterilization Trays, it’s that simple.

PRO-LITE Sterilization Trays can make the most of your investment and optimize your sterilization process.

Use the PRO-LITE Sterilization Trays to:

- Optimize loading capacity for the V-PRO Sterilizer chamber
- Increase weight capacity per tray
- Prepare trays in areas with limited space through pouching
- Protect your instruments with organizers to hold devices in place

One Integrated Approach to Healthcare.
NEW Pouching Options!

Through new pouching options for PRO-LITE trays, packaging instruments can fit your workflow.

Pouching trays can help maximize limited space for tray preparation, wherever you are reprocessing.

- Current Tyvek® spun bound material pouches can be used for PRO-LITE trays
- Single or double pouch trays
- Pouch small devices for surface sterilization within trays

The Right Tray for Your Needs

Regardless of your Vaporized Hydrogen Peroxide Sterilization process, PRO-LITE Sterilization Trays have a range of sizes for all of your instruments. The trays optimize chamber space and accommodate add-on silicone instrument organizers and mats to protect your devices. In addition, they are validated for V-PRO and STERRAD® Sterilizers.
