what’s new
new & featured products | 2020
At STERIS Endoscopy we collaborate and innovate but most importantly, we listen - to you!

As a new product development Company, our team works closely with physicians and nurses around the globe to deliver solutions that address everyday clinical challenges faced by our Customers.

From advanced polypectomy, electrosurgery and GI emergency devices, to infection prevention solutions, we are continuously developing new innovations to improve patient care.

Check out our latest offerings...
Roth Net® retriever - 360

BX00711197 / BX00711198*

- sheath diameter 2.5mm
- length 230cm
- net size 3x5cm

* sterile

The **Roth Net retriever - 360** is the newest innovation and addition to the extensive Roth Net retriever portfolio - offering best-in-class features.

- New spade shaped snare form that opens to full capacity even after multiple passes
- An alternative net weave design, offering enhanced durability, strength and visibility throughout the procedure
- 360 degree, one-to-one rotation allowing for net placement and alignment

Removal of foreign body with the Roth Net retriever - 360
The Padlock Clip defect closure system features a pre-loaded, self-grasping clip designed to encircle, lift, close, manage and secure tissue within the GI tract.

The Padlock Clip defect closure system...
- features quick and easy attachment to the outside of the endoscope
- includes open and free instrument channel for unhindered endoscope suction
- allows for intuitive “push of the thumb” deployment

One clip design for all applications including:
- hemostasis and closure of polyp resection sites <1.5cm and GI tract luminal perforations (ulcers, fistulas) <20mm.

*C*Ability to adjust tissue chamber depth based on scope diameter.
**Histoguide® wire-guided forceps**

**BX00711660**  
- catheter diameter **2.1mm**  
- wire-guided diameter **3.5mm**  
- minimum channel **4.2mm**  
- jaw opening width **8.0mm**  
- jaw diameter **2.2mm**  
- length **230cm**

An ideal pair, the new **Histoguide wire-guided forceps** joins the clinically proven **Infinity® ERCP sampling device**. Pairing the two devices for a two-tiered, multi-modality sampling approach may help improve diagnostic capabilities and lead to increased sensitivity during ERCP procedures to aid in more accurate diagnosis.¹

- offers placement of forceps into the biliary ductal system along a guidewire to facilitate stricture diagnosis

**Infinity® ERCP sampling device**

**BX00711652**  
- sheath diameter **3mm/9FR**  
- length **200cm**  
- sterile

**BX00711653**  
- sheath diameter **2.5mm/7.5FR**  
- length **200cm**  
- sterile

- purpose-built for collecting substantial and quality samples from strictures in the biliary duct and has been proven to deliver a diagnostic sensitivity of up to 85% ²

---

² T.Barrioz, M Wangermex, P. Levillain, M. Beauchant. The Infinity® brush improves the results of brush cytology for malignant biliary strictures. Societe Nationale Francaise de Gastro-Enerlogie (SNFGE). [25-4-2013 10:13:01]
Electrosurgery

The state-of-the-art **gi4000 electrosurgery unit** is designed specifically for flexible endoscopy and has Argon, Monopolar, Bipolar and Lavage functions all built into an intuitively designed user interface.

To complement the gi4000 unit, we also offer an array of accessories including:

- **ArC Smart™ argon coagulation probe**: ensures ideal beam and energy delivery
- **TouchSoft Coagulator® monopolar probe**: for contact coagulation or tissue ablation

For more information on the gi4000 electrosurgery unit and our complete portfolio of accessories, visit [www.steris.com](http://www.steris.com).
The CO₂EFFICIENT® Endoscopic Insufflator features a patented “managed flow” setting which senses when CO₂ is not required by the clinician and reduces flow to help conserve CO₂ supply.

The CO₂MPACT Endoscopic Insufflator® system offers variable flow rate and timer settings which allow the user to adjust and/or stop the flow of CO₂ to ensure the system does not waste any CO₂ after the procedure has been completed.

- Both systems feature internal dual pressure relief valves that are designed to prevent over-pressurization.

We also offer a full line of CO₂ tubing sets and accessories to support the use of the CO₂ insufflator units. For more information on the complete portfolio, visit www.steris.com.
Clinically proven to achieve a significantly higher rate of complete resection, the unique design of the Exacto cold snare offers control and placement for a precise, clean cut when compared to traditional braided snares.\(^1\)\(^,\)\(^2\)

**Exacto® cold snare**

**BX00711115**
- sheath diameter 2.4mm
- length 230cm
- snare width 9mm

- **enables a clean cut with a thin wire design** (0.12”/0.30mm) while maintaining its shape and stiffness
- **features a unique, shield shape that maximizes its width for control and placement**
- **9mm mini snare size that facilitates polyp tissue resection without use of cautery**
- **offers a thin, stiff catheter that decreases buckling while aiding in placement**

---

iSnare® system - Lariat® snare

BX00711084
needle gauge 25
sheath diameter 2.5mm
length 230cm

The iSnare system - Lariat® snare is ideal for minimizing procedure time and aiding in clinical outcomes during submucosal injection polypectomy procedures including EMR (endoscopic mucosal resection) and SAP (saline assisted polypectomy).

- features an alternating injection needle and snare operated by a multi-functional handle
- unique design offers three distinct snare sizes and shapes in one device helping to address a variety of resection needs

Histolock® resection device

BX00711117
catheter diameter 2.4mm
length 230cm
snare size 14 x 27mm
sterile

The Histolock resection device features a stiff monofilament wire to help recruit and resect flat tissue during complex polypectomy procedures.

- twisted wire that lays flat on the mucosa during resection
- mini snare size that offers easy maneuverability for controlled placement and precise resection
Moray® micro forceps

BX00711889
sheath diameter 0.80mm
jaw diameter 0.76mm
jaw opening width 4.3mm
length 230cm

The Moray micro forceps is designed to acquire reliable tissue samples from pancreatic cysts, helping lead to a more definitive diagnosis and targeted therapy.¹

- **serrated jaws that grab tissue**² from the wall of pancreatic cysts
- **stainless steel spring sheath offers functionality in tortuous positions**

STERIS Endoscopy also offers latex and non-latex **Oracle® EUS balloons** that complement the Moray micro forceps and are designed to provide a clear view throughout endoscopic procedures.

Designed to operate in the most tortuous conditions, the **Carr-Locke needle** is ideal for injection therapy of esophageal/gastric strictures, varices, and for endoscopic mucosal resection.

The Carr-Locke injection needle...

- stainless steel, spring sheath to help eliminate kinking
- ultra smooth distal hub is gentle on friable tissue, aids in tamponade and prevents sheath perforations
- spring-loaded handle automatically retracts the needle
