### Objects

- **Food bolus/Most blunt foreign bodies**
  - Net size: 3.0cm x 5.0cm
  - Length: 230cm

- **Large foreign bodies**
  - Net size: 4.0cm x 8.0cm
  - Length: 160cm

- **Small scope channels and foreign bodies**
  - Net size: 2.0cm x 4.5cm
  - Length: 160cm

- **Food bolus/Most blunt foreign bodies**
  - Net size: 4.0cm x 9.5cm
  - Length: 230cm

- **Food bolus**
  - Length: 160cm

- **Sharp/Pointed foreign bodies/Stents**
  - Length: 230cm / 200cm

- **Long or oddly shaped objects**
  - Basket size: 3.5cm x 6.0cm
  - Length: 230cm

- **Foreign body/Sharp object extraction**
  - Length: 25cm / 50cm

### Features

- **Roth Net® retriever - 360**
  - 360 degree, controlled rotation
  - Reinforced net offers strength and durability for tough foreign bodies
  - Fully functions in retroflex or tortuous positions

- **Roth Net® retriever - maxi**
  - Largest capacity retrieval net on the market
  - Specifically designed for large foreign bodies

- **Roth Net® retriever - mini**
  - Designed for smaller scopes and foreign bodies
  - Compatible with smaller channel endoscopes (1.8mm catheter)

- **Roth Net® Platinum® retriever - universal**
  - Large/octagonal shape
  - Reliable design opens to full capacity across multiple passes

- **Talon® grasping device**
  - Inward-facing atraumatic hooks
  - Prong design allows for strong grip of food impactions and foreign bodies

- **Raptor® grasping device**
  - Hybrid jaw design combines alligator and rat tooth capabilities
  - Operates in retroflexed position and in side-viewing endoscopes

- **Falcon® rotatable retrieval basket**
  - Rotatable
  - Three dimensional shape allows for retrieval from various angles

- **Guardus® overtube**
  - Tapered tip design protects against mucosal damage
  - Insufflation cap helps maintain insufflation and guard against leakage of fluids
