Case after case. Day after day. 
STERIS Keeps You Going...

Total Solution Provider For Ambulatory Surgery Centers
Every day, healthcare facilities of all sizes rely on the quality and assurance of STERIS. We’ve built our reputation by anticipating and delivering on the most critical infection control and surgical needs in clinical settings.

STERIS brings this expertise to ambulatory surgery centers (ASCs) to offer a complete solution stretching beyond the SPD and OR.

We understand your environment and its unique needs and help set you up for success as you build or transform your facility.

Applying 100+ years of expertise to the surgery center environment

STERIS helps you to do what you do best — deliver the highest standards of care to your patients with the confidence that your day-to-day operations will run efficiently and profitably.

Sterile processing solutions to keep your ASC running efficiently

Our instrument and device processing solutions help protect your valuable surgical instruments to increase your productivity and help enhance patient and personnel safety.

AMSCO® 600 Medium Steam Sterilizer
Small footprint sterilizer with capacity for 15, 25-pound trays in each cycle.

AMSCO® 30 and 50 Reprocessing Sinks
The stainless-steel decontamination sinks come standard with air and water pistols, magnetic backsplash, two overmount sprayers, etched sink bay markings and pure water faucet to assist in proper, safe and effective manual cleaning of surgical instruments.

AMSCO® 2532 Single-Chamber Washer/Disinfector
An ASC workhorse. A single-chamber washer/disinfector that is both productive and efficient.

AMSCO® 600 Medium Steam Sterilizer
Small footprint sterilizer with capacity for 15, 25-pound trays in each cycle.

V-PRO® S2 Low Temperature Sterilizer
Low-temperature sterilization with a fast, 16-minute Non Lumen Cycle.

We bring so much more to the table

STERIS's intelligently designed portfolio of surgical products and solutions provides virtually everything a surgery center needs to outfit an OR.

- Fully integrated operating room systems
- Integrated ceiling solutions
- High quality surgical lights
- Versatile tables and accessories
- Scrub stations
- Efficiently designed cabinet systems

CLEANSUITE Operating Room Ceiling System
A single-diffuser, cleanroom ceiling system that directs airborne particles and contaminants away from the patient and operating room (OR) staff, while bathing the room with HEPA-filtered air.

HarmonyAIR G-Series Surgical Lighting System
Provides exceptional surgical site illumination and streamlines suspension affordably without compromising quality.

STERIS 4095 General Surgical Table
This radiolucent table offers superior imaging capability, adequate weight and articulation capacity, and ease of mobility for surgical staff.

HarmonyAIR Utility Hub
Designed with cost in mind to help solve the needs of the operating room (OR), combining power and video connectivity and equipment management system (EMS) features.

HexaVue Integration System
An integrated operating room helps your team deliver exceptional patient care by providing the detailed imagery and controls they need at the touch of a button.
Cleaning, disinfection and quality control solutions that complement the instrument reprocessing loop

Prolystica® Ultra Concentrate Cleaning Chemistries
- High-performance cleaning chemistries that effectively remove common surgical soils in manual and automated washer/disinfector.

Prolystica® ZX Concentrate Cleaning Chemistries
- A 10X cleaning chemistry that handles your toughest cases, including mucus, blood and fatty soils, and offers more uses per container.

Revital-Ox® Bedside Complete and Bedside Concentrate Pre-cleaning Kits
- All-in-one enzymatic detergents and impregnated sponges designed for bedside pre-cleaning. Both available in pre-diluted and add-water options.

PRE-KLENZ™ Soak Shield
- Helps initiate the pre-cleaning process of surgical and endoscopic instruments at bedside immediately after use, continuing through transport.

STERIS Instrument Cleaning Brushes
- Efficient cleaning with the right brush for your device. Burr, channel, general and toothbrush style brush configurations help clean surfaces, lumens and crevices of surgical instruments during processing.

VERIFY® STEAM Integrating Indicator 5CM
- The right fit for even the smallest containers.

Celerity™ 20 STEAM Biological Indicator
- Fast-read, 20-minute BI for routine monitoring and testing of commonly used steam sterilization cycles.

VERIFY® All Clean Test Washer Indicator
- A consistent, reproducible method to routinely check the performance of your automated washer/disinfector and instrument cleaning chemistry.

VERIFY® STEAM High Level Disinfectant
- A ready-to-use, fast, safe alternative to aldehyde solutions. Its versatility allows for use in both manual soaking and automated endoscope processors.

Revital-Ox® RESERT® High Level Disinfectant
- A complete, enzymatic, chlorine-based disinfectant solution that offers a safe, effective alternative to aldehyde-based products.

Our full line of instrument reprocessing chemistries includes point-of-use solutions, manual cleaning chemistries, automated washing chemistries and specialty chemistries.
**Excellence and compliance in instrument repair & processing**

**STERIS Instrument Management Services**
Offers fast turn times, competitive pricing, and a commitment to help the Customer avoid expensive endoscope, device, and instrument replacement, through pro-active maintenance and proper handling.

**STERIS Instrument Processing Solutions**
Provides onsite and offsite services for Sterile Processing to ensure regulatory and Instructions for Use (IFU) compliance, staff certification and competencies, and readiness/capacity to support future current and tray volumes.

**SYSTEM 1® endo Liquid Chemical Sterilant Processing System**
Provides safe and effective reprocessing of heat-sensitive critical and semi-critical medical devices and is a practical solution for low temperature liquid chemical sterilization of complex flexible endoscopes, such as duodenoscopes used in endoscopic retrograde cholangiopancreatography (ERCP) procedures.

**Capital Solutions**
Specifically for flexible endoscopy with Argon, Monopolar, Bipolar and Lavage functions all built into one compact unit for versatility.

**Reliance™ Endoscope Drying and Storage Cabinets**
Through a combination of unique features on a variety of models – HEPA filtered air, digital access and tracking, vertical storage, channel purging and premium construction – Reliance Endoscope Drying and Storage Cabinets meet or exceed all current standards and guidelines including AAMI ST91:2015, AORN, and SGNA.

**Mobile Sterile Processing Department**
A fully integrated SPD allows for continuous support without disruption during Surgery Center construction, renovation, or additional SPD capacity.

**Certified Pre-Owned Devices**
Enhance your inventory with fully refurbished equipment (which includes a one-year warranty) without breaking your budget. Each of our Certified Pre-Owned devices has undergone a multi-point functionality inspection, ensuring it performs like new.

**VIA® Procedural & Custom Kits**
Our single-use procedural infection prevention products promote patient safety and include convenient standard and custom kit configurations with over 50 components, disposable biopsy and air/water suction valves, irrigation, and water bottle systems.

**Bleed Management**
We are dedicated to assisting your staff by delivering endoscopy devices that better prepare you for emergency situations. Customers have come to rely on our essential devices for unsurpassed security and peace of mind during challenging retrieval and bleed management cases.

**Sterile Processing Solutions**
Provides onsite and offsite services for Sterile Processing to ensure regulatory and Instructions for Use (IFU) compliance, staff certification and competencies, and readiness/capacity to support future current and tray volumes.

**STERIS offers full portfolios of innovative endoscopy equipment**

When you work with STERIS, you’re not just buying a product. We offer comprehensive service, consultative planning and design services, along with continuing education resources to ensure you’re prepared for what’s next.

Earn Continuing Education Credits
We offer a wealth of education resources available for you to continue your education in the healthcare industry. Clinical education opportunities both in-person and online. Stay current on standards, best practices and updated healthcare topics.

Planning and Design
Designing your surgery center can bring many challenges. Lean on our experience to help you optimize your facility with the highest levels of productivity and efficiency while affording flexibility for expected growth strategies and future technologies. Our professionals possess an average of 25 years of experience in hospital and healthcare facility planning and design. Services range from simple equipment placement and single room layouts to entire department design, including operating room design.
The stakes are high, the pace is fast, and the standard of care cannot be compromised. Controlling expenses and maximizing space requires a flexible partner who adds value at every opportunity.

That’s why every piece of equipment we make, every product we deliver, and every service we provide is one that you can rely on, case after case, day after day.
