DAILY AIR REMOVAL TESTING USING VERIFY™ BOWIE DICK TEST PACKS

1. Place the test pack in an empty chamber in the most challenging location, typically on the bottom shelf above the drain.

2. Run the Bowie Dick Test Cycle.

3. Remove test pack from sterilizer.

4. Open the test pack and interpret and record results.

---

FAILING TEST RESULTS

A failing Bowie Dick Indicator result can be caused by several conditions, including but not limited to:

- Air leak
- Presence of Non-Condensable Gas (NCG)
- Presence of moisture/wet steam
- Superheated Steam
