PRODUCT NAME:	PRODUCT NUMBER:
Vapour Strip multi-variable Indicator- 71mm×22mm	2501

These products are NOT hazardous products according to the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

Vapour Strip multi-variable Indicator are chemical indicators intended for use inside individual packs, trays or pouches. The indicator changes colour from magenta to yellow when exposed to a vaporised hydrogen peroxide process.

Vapour Strip multi-variable Indicator contains 0.7mg dyes and 0.7mg reagents. None of the substances used in the formulation and packaging contain no known carcinogens, no heavy metals and no added rubber latex. The component chemicals are potentially irritant. When used as intended, the indicator does not release any known to be toxic in sufficient quantities to cause a health hazard, during or after sterilization process for which it is designated, in accordance with ISO 11140-1:2005,5.9

In the case of accidental exposure, take the following precautionary measures:

Being fully encapsulated, this should present no occasion for contact with the chemical components. If however, contact is made due to breakdown of the encapsulation, wash the skin with soap and water. If ingested wash out mouth thoroughly and give plenty of water to drink.

Storage and Disposal:

Recommended Storage: Store at cool, dark, dry conditions 0- 30°C, 30-60% RH.

Waste Disposal Methods: Treat unwanted indicators and packaging in the same way as normal paper waste.

The information on this sheet is not a specification and does not guarantee specific properties. The information is intended to provide general knowledge as to health and safety based upon our knowledge of the handling, storage and use of the product. It is not applicable to unusual or non-standard uses of the product or where instruction or recommendations are not followed.
